

SIYANDA KOPOLO

SOFTWARE DEVELOPER

PROFILE SUMMARY

I am a Deaf woman who used to communicate using sign language during interviews that required a personal interpreter. I completed my Diploma in Information Technology (Software Development) at Belgium Campus iTversity for three years, plus one year of self-development at Botlhale Village, which subsidized the Belgium Campus iTversity for In-Service Training, and one year of the IOCO Software Developer Graduate program.

I am a flexible and friendly person who works well in a team as well as on my own because I like to set goals for myself that I will achieve. I also have good listening and fast learn. I have a creative mind and am always eager to take on new challenges.
